Portfolio: fernando.works/portafolio.pdf

Speaking Languages:

- **Spanish:** Natively
- **English:** Fluently, Bilingual

Programming languages:

JavaScript (ES6+), HTML5, CSS3, PHP, Java, Swift / Obj C.

Frameworks, Libraries, CMS, etc:

Bootstrap, WordPress, **NodeJS**, Firebase, Kendo UI, **jQuery**, Express, **Vue.js**, **Angular**, **AJAX**, JSON, UX, Jade, **SASS / SCSS**, ASP.NET Razor C#, RESX, Vuforia, Twilio, **Continuous Integration**, Google Maps API, Contentful, **Jasmine**.

Tools:

Git, Bitbucket, Trello, TFS, Gulp, Grunt, **NPM**, yarn, **Webpack**, bower, Netlify, Sketch App, Blender, Adobe XD, Photoshop, After Effects, Splunk Cloud.

Herbalife Nutrition. Front End Developer. Oct 2018 - Present

Collaborated with other agile-teams across the world using tools like Webex, Skype, TFS, and MS Teams to give support implementing new UI features, fixing bugs, and managing RESX translation files for the Shopping Cart global project affecting more than 90 countries.

Worked side-by-side with Back-end developers, QA testers, and Business Analysts.

Also fixed unexpected sales-blocking production bugs while being under pressure.

Worked heavily with dev tools from chrome to debug and fix hybrid mobile apps bugs.

Helped migrating TFS 2015 to TFS 2018 (with Git) and successfully proposed the usage of Trello to manage and visualize existing workflow.

Implemented a Front End logger class and API to log errors and other type of alerts to Splunk Cloud thus being able to generate graphics in a dashboard to better diagnose problems.

Augmented percentage for unit test coverage to more than 60%.

Tools and technologies: Javascript, CSS, HTML, npm, SASS, NodeJS, Kendo UI, Ajax, Jasmine, RESX, ASP.NET Razor C#, Continuous Integration, Splunk Cloud.

Freelance Web Developer. Jun 2018 - Oct 2018

I designed and developed a website for a company called Arqccesible (arqccesible.com) using my own framework for developing customized websites.

Participated in various UI design contests online in websites like 99designs and Freelancer.com

Tools and technologies: Javascript, HTML5, CSS, Vue.js, Sketch App, Blender, Git, Netlify, Continuous Integration.

Agencia de Interpretación, Traducción y Comunicación Alternativa. (Startup) Full Stack Developer and Designer. Jan 2017 - Jun 2018

I had many tasks working here going from graphic design, ui/ux design to full stack developer:

Designed the interfaces for three mobile applications and one web admin panel (AICA Access, SignTime Personal & SignTime Interpreter) using Sketch App and made prototypes at various levels (sketches, wireframes, colorful design) using Origami.

Developed two different projects Signtime and AICA Access. For the first I developed three native apps: one for Android and the other two for iOS. There are more details about this in my portfolio. For the second project I developed a native app for Android using Vuforia for AR functionality and Firebase as back-end.

I Teamed with another engineer to implement the interface for SignTime on Android.

Used Twilio Video services as the main provider for the SignTime apps.

Tools and technologies: Swift / Obj C, Java, Javascript, Firebase, Xcode, Android Studio, Sketch App, Origami, Git, Vuforia, NPM.

Freelance Web Developer. Aug 2015 - Oct 2015

I worked remotely for a small marketing agency that also designed websites for their clients. I developed those websites using WordPress self-hosted version.

Tools and technologies: Javascript, HTML, CSS, PHP, WordPress.
